Hey Chris,

## Ex. 5 AC/DP

I'd be happy to talk with PADEP along with you too.

Thanks!  
Andy

Andy/Charlie,

Below is a request for potential future land use at the Keystone site. The property is about 70 acres (the 69 acres referenced in the email), with about 50 acres comprising the landfill itself. The remaining 20 acres are comprised of standing forest or land in and around the on-site residence, groundwater treatment building, and off-gas/condensate flare. It is not used or suitable for agricultural use. In contrast to the claim in the email, the grasses on the landfill cover are not harvested for hay. The OU-1 Respondents cut the grass as part of cover O&M activities.

# Ex. 5 Deliberative Process (DP)

I am not familiar with Tom Sweeney at DEP, but it appears he is a "Biosolids Coordinator" in their SCRO.

Thanks – Chris

**Subject:** 355 Clouser Rd, Hanover PA - Possible Land Application Site

Good Afternoon!

We recently have been in touch with Thomas Sweeney at Pennsylvania Department of Environmental Protection in regards to the property located at 355 Clouser Rd, Hanover PA (Former Keystone Land Fill). He had forwarded your contact information to us.

We are inquiring about the possibility of using this site for a residential septage land application site following the requirements set forth by DEP for land application as well as the EPA Part 503 Rule. This 69 acre parcel has parts of it currently being farmed for hay. There is also substantial acreage surrounding this parcel that is being farmed as well making this site ideal for a base of operations for a land application site. The property is also fenced in with 8' high fences.

We look forward to hearing your input on the requirements and possibility of moving forward with the land application.

Thank You,

Sean & Laurel Herrick
